

# Measures of Project Success

Number of group educational presentations
Number of individual educational presentations
Number of health fairs in which the organization participated
Number of other educational activities (please specify)
Number of people educated on breast cancer and/or breast health
Percentage of people educated on breast cancer and/or breast health who are medically uninsured or underinsured
Number of people with increased knowledge of a topic after the educational session, as shown through pre- and post-tests
Percentage of people educated with increased knowledge of a topic after the session, as shown through pre- and post-tests
Number of people to whom informational pieces were distributed
Total Number of clinical breast exams provided
Number of clinical breast exams provided by age: (Under 40, 40-49, 50-64, 65+)
Number of clinical breast exams provided by Race: (Caucasian, Hispanic, Black, Asian, Native American, Other, Unknown)
Number of clinical breast exams provided By prior history: (First Time, Repeat)
Total Number of screening mammograms provided
Number of screening mammograms provided by age: (Under 40, 40-49, 50-64, 65+)
Number of screening mammograms provided by Race: (Caucasian, Hispanic, Black, Asian, Native American, Other, Unknown)
Number of screening mammograms provided By prior history: (First Time, Repeat)
Number of people to whom informational pieces were distributed in addition to providing screening services
Number of people receiving navigation services through the screening and diagnostic process
Number of people receiving case coordination/management services through the screening and diagnostic process
Total number of patients receiving diagnostic services
Total number of patients receiving diagnostic services as a percentage of screenees.
Number of diagnostic mammograms provided
Number of patients receiving diagnostic mammograms as a percentage of screenees.
Number of surgical consults (including pre- and post-surgery care)
Number of patients receiving surgical consults as a percentage of screenees.
Number of ultrasounds provided
Number of patients receiving ultrasounds as a percentage of screenees.
Number of biopsies provided
Number of patients receiving biopsies as a percentage of screenees.
Total Number of breast cancers detected
Number of breast cancers detected by age: (Under 40, 40-49, 50-64, 65+)
Number of breast cancers detected provided by Race: (Caucasian, Hispanic, Black, Asian, Native American, Other, Unknown)
Number of people receiving navigation services through the treatment process
Number of people receiving case coordination/management services through the treatment process
Number of individuals referred out for diagnostic follow-up.
Number of individuals referred out for diagnostic follow-up as a percent of screenees
Number of patients for whom rides were provided for treatment-related services
Total number of rides provided for treatment-related services
Number of patients assisted by a translator or bilingual breast health staff member

Number of patients receiving counseling services
Total number of counseling sessions provided
Navigation and Care Coordination/Management Services
Number of patients educated about care coordination/care management services
Number of patients actually receiving care coordination/care management services
Number of one-time referrals for patients
Number of patients educated about a navigator program
The number of patients actually receiving navigation services
Number of patients participating in a navigation program with a low need (less than 3 hours of service)
Number of patients participating in a navigation program with a moderate need (between 3 and 10 hours of service)
Number of patients participating in a navigation program with a high need (more than 10 hours of service)
Number of patients served by an exercise program
Number of patients receiving nutrition counseling
Number of patients receiving hospice services
Total number of days of hospice services provided and average days per patient served
Number of patients receiving in-home health services
Total number of in-home health service visits provided and average days per patient served
Number of families receiving bereavement support
Number of patients participating in a support group
Number of patients receiving childcare services during treatment
Number of patients receiving non-medical in-home services (including homemaking, cooking, cleaning, etc)
Number of patients receiving meals during treatment
Total number of meals provided
Number of patients receiving financial assistance related to medical services
The average amount of financial assistance provided per patient
Number of patients receiving assistance with paying their medical bills
Number of patients receiving assistance with co-pays
Number of patients receiving assistance in paying for medical services
Number of patients receiving assistance in paying for medical insurance
Number of patients receiving non-medical financial assistance
The average amount of financial assistance provided per patient
Number of patients receiving financial assistance related to housing costs (including rent and mortgage payments)
Number of patients receiving financial assistance related to paying utility bills (water, electricity, etc)
Number of patients receiving financial assistance related to household expenses (child care, food, other bills, etc)
Number of patients assisted with transportation needs (car payments, gas money, public transportation vouchers, car repair, etc)
Number of patients participating in retreats during or immediately following treatment
Number of patients receiving alternative and/or complementary therapies during treatment (list types of therapy individually)
Number of patients reporting improved quality of life from participating in a Komen-funded project/program
Number of patients reporting improved physical well-being from participating in a Komen-funded project/program
Number of patients reporting improved emotional well-being from participating in a Komen-funded project/program
Number of patients reporting improved comfort from participating in a Komen-funded project/program
Number of patients reporting an improved level of dignity from participating in a Komen-funded project/program
