Phone	(870) 336-4815	
Counties Served	Craighead Clay Crittenden Cross Fulton Greene Independence Jackson Lawrence	Mississippi Monroe Poinsett Randolph Sharp St. Francis White Woodruff
Project Summary	<p>Some women in Northeast Arkansas can not afford breast health screening and diagnostic services. They are low-income and uninsured, underinsured, or they do not qualify for other financial resources. This project identifies and provides indigent women with digital screening and diagnostic mammograms, breast ultrasound, ultrasound breast core biopsies and stereotactic biopsies. The time span between a woman's abnormal diagnostic mammogram and the follow-up procedures, can be crucial to her health and well-being. Susan G. Komen BreastAssured IV enables eligible women to immediately go forth with these procedures rather than waiting until they can garner financial support. Many entities will promote this project. They include three community hospitals, nine primary care clinics – primarily in medically underserved areas, many local physicians, St. Bernards Medical Center and the St. Bernards Mobile Mammography Coach.</p>
