<b>Phone</b>	(870) 336-4815
<b>Counties Served</b>	Craighead Mississippi Clay Monroe Crittenden Poinsett Greene Randolph Independence St. Francis Jackson Woodruff Lee
<b>Project Summary</b>	<p>On the Road to Better Breast Health – Expanded travels throughout Northeast Arkansas to reach women where they live and work. The staff presents breast health education and screening mammography on board St. Bernards' Mobile Mammography Coach to women at outreach sites (businesses, manufacturing plants, clinics, churches, etc.). The staff mails the medical results to each woman and her physician. They track each woman with an abnormal mammogram and follow up as needed. They also present breast health education to women's community organizations. This year, the program will add "free" screening mammograms on the mobile for some eligible women. It will also serve migrant women at a health fair (in collaboration with White River Rural Health Center) and women attending some of St. Bernards' existing "community and industry screenings." This is the only mobile mammography program serving women in Northeast Arkansas. It is the only mammography source for many of them.</p>
