

Project Title: Early Detection for Your Protection

Amount: \$10,000

Project Description:

The “Early Detection for Your Protection” program seeks to increase the number of low-income and underserved women ages 40 and older who receive mammograms by 40% through alleviating barriers to services due to lack of transportation and breast care education. Six-month, multi-use transit passes will provide women needing transportation to mammography screenings and/or breast cancer treatment. The passes will also allow women to access specialty care in Memphis, TN, the tertiary health care center. The education services will teach women the three types of breast care and will eliminate myths surrounding mammography services and breast cancer.
