

Project Title: Link to Life Breast Cancer Prevention Program II

Amount: \$39,412.50

Project Description:

Delta Memorial Hospital, a rural non-profit health facility in Southeast Arkansas, will seek to reduce the incidence of breast cancer therefore reducing the mortality rate among women in our four county service area. We will use the following tools in this fight; promote early detection, provide breast health educational classes and materials, reduce anxiety by offering mammogram comfort pads, and provide screening mammograms for all women with special emphasis on the minority, low income, uninsured and underinsured. Our proposal is to expand the *Link to Life* program by offering a Breast Cancer Prevention II program and therefore make available to the women in Arkansas, Desha, Drew and Lincoln counties every tool they would need to accomplish this personal health goal.

Service Area:
