

**Project Title:** Reducing Rural Reluctance

**Amount:** \$9,306

**Project Description:**

The women residing in rural Arkansas are often reluctant to make personal health a high priority. Since our state statistics show that 1 in 5 employed Arkansans are uninsured, Ouachita County Medical Center believes that the lack of financial means and/or insurance coverage is a primary reason for this reluctance.

Ouachita County Medical Center wishes to reduce this reluctance, especially in the area of breast health. The ability to provide at least one woman per week in rural Arkansas with a free mammogram, made possible through grant funding, will allow us to make great strides in the effort to reach out to the women of rural Arkansas.

**Service Area:**
