
St. Vincent Breast Center

Project Title: Screening and Diagnostic Services for Underserved Women

Amount: \$45,030

Project Description:

With support from the Arkansas Affiliate of the Komen Foundation, St. Vincent Breast Center will provide screening and diagnostic services to underserved women of Arkansas who are the working poor. These women make just enough money so that they don't qualify for government assistance programs in Arkansas. Yet they have no insurance coverage or coverage with such a high deductible that they cannot afford to meet it. During the months of September and October 2007, St. Vincent Breast Center will offer screening mammograms to women ages 40-61 who have little or no insurance, do not qualify for government assistance programs in Arkansas and are up to 250% above the poverty level. St. Vincent Breast Center will also offer diagnostic mammograms, breast ultrasounds, interventional procedures and breast MRIs to women who meet the criteria for diagnostic mammogram and meet the financial criteria described above.

Service Area:
