

Project Title: To Save a Life

Grant Amount: \$21,500

Project Description:

To Save a Life, a program offered by the St. Edward Mercy Health Network, provides economically disadvantaged individuals full, free access to breast screening and diagnostic procedures through St. Edward Mercy Medical center located in Fort Smith. The hope is to expand *To Save a Life* to provide breast health education to the rural communities served by the network's three regional hospitals (North Logan Mercy Medical Center in Paris, Mercy Hospital/Turner Memorial in Ozark, and Mercy Hospital of Scott County in Waldron). Education will be provided through the Mercy Mobile Mammography van and through various community education events. We also desire to hire a program coordinator to organize and carry out education events. This individual will work to build a network among local providers and interested parties, and assist patients in navigating the healthcare system.

Service Area:
